**Indication of Immediate Medical Attention** 

and Special Treatment Needed:

Provide general supportive measures and treat symptomatically. Keep victim under observation. Symptoms may be delayed.

4.3 – General Information

**General Information:** 

Ensure that medical personnel are aware of the material(s) involved, and take precautions

to protect themselves.

## **Section 5** – Fire-Fighting Measures

## **5.1** – Extinguishing Media

Suitable Extinguishing Media: Powder. Alcohol resistant foam. Dry chemicals. Carbon dioxide (CO2). Unsuitable Extinguishing Media: Do not use water jet as an extinguisher, as this will spread the fire.

## 5.2 - Special Hazards Arising From the Substance or Mixture

Specific Hazards Arising from the Chemical: Contents under pressure. Pressurized container may explode when exposed to heat or flame.

**5.3** – Advice for Firefighters

Fire-Fighting Equipment/Instructions:

Special Protective Equipment and Firefighters must use standard protective equipment including flame retardant coat, helmet

**Precautions for Firefighters:** with face shield, gloves, rubber boots, and in enclosed spaces, SCBA.

> Move containers from fire area if you can do so without risk. Cool containers exposed to heat with water spray and remove container, if no risk is involved. Containers should be cooled with water to prevent vapor pressure build up. For massive fire in cargo area, use unmanned hose

holder or monitor nozzles, if possible. If not, withdraw and let fire burn out.

Use standard firefighting procedures and consider the hazards of other involved materials. **Specific Methods:** 

Move containers from fire area if you can do so without risk. In the event of fire and/or

explosion do not breathe fumes.

General Fire Hazards: Extremely flammable aerosol.

# **Section 6** – Accidental Release Measures

## 6.1 – Personal Precautions, Protective Equipment and Emergency Procedures

Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Keep out of low areas. Eliminate all ignition sources (no smoking, flares, sparks, or flames in immediate area). Wear appropriate protective equipment and clothing during clean-up. Avoid breathing gas. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ventilate closed spaces before entering them. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.

# **Safety Data Sheet**

according to Federal Register / Vol. 77, No. 58 / Monday, March 26, 2012 / Rules and Regulations

## 6.2 – Methods and Material for Containment and Cleaning Up

Refer to attached safety data sheets and/or instructions for use. Eliminate all ignition sources (no smoking, flares, sparks, or flames in immediate area). Keep combustibles (wood, paper, oil, etc.) away from spilled material. Stop leak if you can do so without risk. Move the cylinder to a safe and open area if the leak is irreparable. Use water spray to reduce vapors or divert vapor cloud drift. Isolate area until gas has dispersed. Prevent entry into waterways, sewer, basements or confined areas. Following product recovery, flush area with water. For waste disposal, see section 13 of the SDS.

## **6.3** – Environmental Precautions

Avoid discharge into drains, water courses or onto the ground.

## Section 7 - Handling and Storage

## 7.1 - Precautions for Safe Handling

Pressurized container: Do not pierce or burn, even after use. Do not use if spray button is missing or defective. Do not spray on a naked flame or any other incandescent material. Do not smoke while using or until sprayed surface is thoroughly dry. Do not cut, weld, solder, drill, grind, or expose containers to heat, flame, sparks, or other sources of ignition. All equipment used when handling the product must be grounded. Do not re-use empty containers. Avoid breathing gas. Avoid contact with eyes. Avoid prolonged or repeated contact with skin. Avoid prolonged exposure. Use only in well-ventilated areas. Wear appropriate personal protective equipment. Wash hands thoroughly after handling. Observe good industrial hygiene practices.

## 7.2 - Conditions for Safe Storage, Including Any Incompatibilities

Level 3 Aerosol.

Store locked up. Pressurized container. Protect from sunlight and do not expose to temperatures exceeding 50°C/122 °F. Do not puncture, incinerate or crush. Do not handle or store near an open flame, heat or other sources of ignition. This material can accumulate static charge which may cause spark and become an ignition source. Refrigeration recommended. Store away from incompatible materials (see Section 10 of the SDS).

8.2 - Exposure Controls

Appropriate Engineering Controls: Good general ventilation (typically 10 air changes per hour) should be used. Ventilation rates

should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level.

Provide eyewash station.

Individual Protection Measures, Such As Personal Protective Equipment:

**Eye/Face Protection:**Wear safety glasses with side shields (or goggles). **Hand Protection:**Wear appropriate chemical resistant gloves.

**Skin Protection** 

**Other:** Wear appropriate chemical resistant clothing.

Respiratory Protection: If permissible levels are exceeded use NIOSH mechanical filter / organic vapor cartridge

or an air-supplied respirator.

Thermal Hazards: Wear appropriate thermal protective clothing, when necessary.

General Hygiene Considerations: When using do not smoke. Always observe good personal hygiene measures, such as washing

after handling the material and before eating, drinking, and/or smoking. Routinely wash work

clothing and protective equipment to remove contaminants.
